Risks: Teachers and school administrations may resist the change due to deep rooted social norms and traditional practices despite increased knowledge following the training; government may not allocate adequate resources due to budgetary constraints and priorities, as well as due to poor acknowledgement of the issue.	*Surveys to be conducted with teachers and students.
	OC2.2a Percent of school management committee members and other non-teaching staff (who are trained on gender stereotypes and gender norms) who demonstrate positive attitudes and perceptions on gender norms and gender stereotypes.	Sex, Location, Level of School, Ethnicity, Types (administrators , SMC members), Disability	2-3 years	Survey* (e.g. Baseline & Midline, Endline)		*Surveys to be conducted with teachers and students.
	OC2.2b Percent of school management committee members and other non-teaching staff (who are trained on gender stereotypes and gender norms) who demonstrate improved skills and practices to support the delivery of gender un-stereotyped education in the schools.	Sex, Location, Level of School, Ethnicity, Types (administrators , SMC members), Disability	2-3 years	Survey* (e.g. Baseline & Midline, Endline)		*Surveys to be conducted with teachers and students.
Output 2.1	School teachers and school administrators have increase gender stereotypes	If teachers and school administrations are sensitized and trained on gender				
	OP2.1.1 Percent of schoolteachers (who are trained on gender stereotypes and gender norms) have increased knowledge and understanding of gender norms and gender stereotypes in education.	Sex, Location, Level of School, Ethnicity, Types (headteacher, subject teachers), Disability	2-3 years	Survey (e.g. Baseline & Midline, Endline)	stereotypes and gender norms and internalize the issue; teachers training modules effectively integrate the contents on gender norms and gender stereotypes, if enabling environment prevails in the schools (policy, reflection of gender norms and gender stereotypes in the teachers' training modules, mentoring and follow up and support from relevant education authorities etc.).	
	OP2.1.2 Percent of school management committee members and other non-teaching staff (who are trained on gender stereotypes and gender norms) have increased knowledge and understanding of gender norms and gender stereotypes in education.	Sex, Location, Level of School, Ethnicity, Types (administrators , SMC members), Disability	2-3 years	Survey (e.g. Baseline & Midline, Endline)		
Outcome 3	School and institutional environment is strengthened to	If school and education administrations are sensitized				
	OC3.1 Number (and percent) of educational institutions with policies and procedures for dealing with discrimination, school-related gender-based violence, including sexual harassment.	Location, Level of Government, Level of Schooling	Annual	Administrative Records (Policies, Plans etc.)	on the issue of gender norms and gender stereotypes, government adopts various aspects of ending gender stereotypes in their policies and plans; if ending gender	Adapted from GES toolkit indicator (Percentage of schools that have developed and put into practice a code of conduct with reference to SRGBV)
	OC3.2 Number (and percent) of women and men completing a technical, vocational, or other tertiary qualification by subject area.	Sex, Location, Age, Grade, Ethnicity, Disability, Subject area	Annual	Administrative Records (Policies, Plans etc.)	stereotypes in schools receives budgetary allocation, there is mentoring, support and reporting is integrated into EMIS.	Adapted from GES toolkit indicator (Participation rate in technical and vocational programs (15 to 24-year-olds) (UIS SDG 4 Dataset)

Results Statement	Key Indicators	Level of Disaggregation	Periodicity	Means of Verification (MoV)	Assumptions & Risks	Remarks
	OC3.3 Number (and percent) of administrative areas/divisions that adopt gender un-stereotyped education curricula at scale covering at least 70% of schools in their territory.	Location, Level of Government	Annual	Administrative Records (Policies, Plans etc.)	Risk: There is risk of delay from government on adoption of ending gender stereotypes in the education policies and plans due to lack of interest, less priority and lack of funding.	
	OC3.4 Number (and percent) of schools that adopt and implement gender un-stereotyped education curricula effectively.	Location, Level of Government, Level of Schooling	Annual	Administrative Records (Policies, Plans etc.)/Survey		
Output 3.1	Supportive policy environment enables schools and orga un-stereotyped education effectively	If there is sensitization and policy advocacy support to the government (Ministry of				
	OP3.1.1 Number of governments policies, plans, curricula, and budget plans/documents that reflect adoption of gender un-stereotyped education	Location, Level of Government, Level of Schooling	Annual	Administrative Records (Policies, Plans etc.)	Education and Department of Education, Curriculum Development Centre and Teachers Training Centers, etc.) and buy-in by the respective government in adaptation of gender un-stereotyped education curricula and mainstreaming into the policies and plans.	
	OP3.1.2 Number of school curricula that are free from gender stereotyped messages/content in the textbooks and teaching-learning materials.	Location, Level of Government, Level of Schooling	Annual	Administrative Records (Policies, Plans etc.)		
Output 3.2	Availability and use of locally contextualized learning ma	If the organizations engaged in implementation of the				
	OP3.2.1 Number of locally contextualized learning materials developed and are available for use.	Location, Types (e.g. for students, teachers, community etc.),	Annual	Administrative Records (learning materials and other products etc.)	ending gender stereotypes in schools programming prioritize the development of learning materials and knowledge resources with allocation of adequate human resources and budget, if there is advocacy around the need of integration and use of locally contextualized learning materials, if there is conducive environment and organizational culture in terms of sharing of resources and learning materials.	
	OP3.2.2 Number of knowledge resources developed and shared among relevant organizations and partners.	Location, Types (e.g., success stories, lessons learned, research etc.)	Annual	Administrative Records (knowledge products etc.)		
	OP3.2.3 Number of (and percent) of schools using locally contextualized learning materials or knowledge resources.	Location, Level of Schooling	Annual	Administrative Records, programme monitoring		
	OP3.2.4 Number (and percent) of administrative areas/divisions that use locally contextualized learning materials or knowledge resources.	Location, Level of Government	Annual	Administrative Records, programme monitoring		

Note: OECD proposed areas of interventions to address gender stereotypes in schools

- (1) Governance goals, from international to local, and equitable choices; legislation, responsibility, and support; and educational offerings that include learning environments.
- (2) Capacity building creating educational environments that foster inclusion through mechanisms such as public awareness campaigns, assessing needs for training and implementing strategies.
- (3) School-level interventions providing resources for students, from a positive school climate to counselling, inclusive curriculum, and organizations.
